VICTORIAN CONTAINER REFUND SCHEME OUTLINE WELCOMED

The Australian Council of Recycling (ACOR) today welcomed the Victorian Government's discussion paper to introduce a 10cent refund on recycled drink containers and urged the government to implement its preferred governance model to take effective control of the design of the scheme.

"A well-governed and implemented container refund scheme for Victoria will be a win for the environment, community and business", said Robert Kelman, ACOR CD Division Coordinator.

"The government's preferred model of tendering for collection network operators is appropriate and offers the best opportunity for Victorian consumers to be supported by a diverse and convenient network of refund points", said Kelman.

"ACOR and its members look forward to supporting the government in implementing a scheme that supports consumers and maximises recycling rates," said Kelman
